DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-8, drawn to a method of printing a polychromatic image on a cork.

Group II, claim(s) 9, drawn to an ink cartridge.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The common feature of the cartridge of claim 9 and the subject matter of claims 1-8 is that they are used in a polychromatic image printing on cork. The ink cartridge according to claim 9 is one of the cartridges suited for a machine of polychromatic image printing. No difference can be seen to e.g. a cartridge for a monochromatic image. Therefore the cartridge itself does not claim any specific features which are part of the polychromatic image printing process on cork.

3. During a telephone conversation with Ed Meilman on 5/1/03 a provisional election was made with traverse to prosecute the invention of Group 1, claims 1-8.

Affirmation of this election must be made by applicant in replying to this Office action.

Claim 9 is withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

Aft Unit: 2854

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Choate et al. (DE 19807924) in view of Collins (US 5,641,573).

Choate et al. discloses a method and apparatus for printing different color inks onto the outside face of a curved surface, however he does not explicitly disclose printing on a cork. Collins teaches desirability of printing on a cork to improve the aesthetic look of the corks or to convey information.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to use the polychromatic printer of Choate et al. to print on a cork, for the purpose of providing a cork with the improved polychromatic image of Choate et al.

Allowable Subject Matter

6. Claims 2-8 are allowed.
